DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the closest prior art of record is Soref, U.S.P. No. 5,838,870. The teachings of Soref 870' was fully discussed during the prosecution of this application. Neither Soref 870' or any of the references of record teaches or suggests the claimed integrated optical device and method for forming same comprising: a substrate upon which is formed a first cladding layer, forming a core layer on the first cladding material, etching the device in regions forming a complement of a desired waveguide core, having an etching step removing material from the core layer and at least some material from the first cladding layer so that the first cladding layer forms a mesa formation substantially covered by the waveguide core and forming a second cladding layer over the first cladding layer and waveguide core wherein the height of the mesa formation is selected so as to give a substantially zero (or a substantially reduced level of) birefringence in the waveguide core. These limitations are recited in claims 1-20 along with other additional limitations (See claims 1-20 for specific limitations.)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
